

THE CERAMIC ADVANTAGE!
KYOCERA ADVANCED CERAMICS

This super-efficient grater, made from advanced ceramic close in hardness to diamond, will make any grating task a snap. With rows of long-lasting sharp teeth, roots such as ginger are quickly shredded, leaving the unwanted fibers behind. Also great for elephant garlic or daikon radish!

The non-corrosive bowl collects the gratings and flavorful juices, without altering the taste. For ease of use, a silicone ring underneath holds the grater in place.

CAUTION

- Please keep away from children.
- Do not use metal spoons, etc. for taking grated food.
- Avoid extreme heat or shock.

Care & Use

Place grater on dry surface. Grate food in circular motion for best results. Dishwasher safe.
