Hot plate	Yes
Auto switch-off	By default after 40 minutes

Productdescription short

Moccamaster KBG Select

The favourite coffee machine for brewing 4 to 10 cups of coffee. Available in more than 20 colours.

Productdescription long

Moccamaster KBG Select

Our Moccamaster coffee machines are handmade in the heart of the Netherlands since 1968. Never has coffee tasted so good as with a Moccamaster filter coffee machine. It is not without reason that Moccamaster has been internationally awarded as the best coffee machine by experts from the European Coffee Brewing Center and the Specialty Coffee Association. The KBG Select is the perfect coffee machine for brewing 4 to 10 cups of coffee. If you brew less coffee, we recommend the Moccamaster Cup-one.

The unique taste experience of Moccamaster

The secret behind a perfect cup of coffee is the temperature at which the coffee is prepared. Moccamaster's copper heating element is unique and ensures an optimal brewing temperature between 92°C and 96°C. Why is this temperature optimal? If coffee is made too cold, it tastes sour. If coffee is brewed too hot it tastes bitter. Moccamaster finds the perfect balance and prepares coffee at the right temperature, so you drink the tastiest cup of coffee.

The benefits

- Fast: a full jug of coffee in 6 minutes
- Hot coffee: perfect brewing temperature of 92-96°C
- Ingenious: selector switch for optimum taste with a full or half-full pot of coffee
 - Intelligent: the hot plate keeps your coffee at 80-85°C
 - Fire-safe: switches off automatically after 40 minutes
 - Iconic design and available in a lot of colours
- Handmade in the Netherlands using high-quality materials
- Durable: long lifespan and repairable, 5-year warranty and all parts are available separately
- Certified by the European Coffee Brewing Center (ECBC) and Specialty Coffee Association (SCA)

Select selector switch

Using the selector switch, you can easily choose a full or half-full pot of coffee, while maintaining optimal flavour. In the half-pot setting, the flow time is delayed. This gives the water enough time to harness the full flavour and aromas of the coffee, just like a full pot. This makes the KBG Select perfect for both a full pot of coffee and several cups.

Hot plate

Moccamaster's filter coffee machine keeps the jug of coffee warm at 80-85°C. This allows you to enjoy a delicious cup of coffee for an extra-long time. The hot plate switches itself off by default after 40 minutes, which keeps the coffee machine fireproof.

Durable

Moccamaster's coffee machine is made with high-quality materials, ensuring that your coffee machine lasts as long as possible. To ensure the quality of the filter coffee machines, Moccamaster offers a 5-year warranty on every machine. So you can enjoy perfectly brewed coffee and a beautiful design for even longer.
